CN ASSIGNMENT(Transport Layer)

Across

- **2.** Mechanism used to avoid long response times
- **4.** Number of strategies used by sending host in crash recovery
- **9.** Primitive used to terminate the connection in connection-oriented Service
- **10.** Buffers are used in which service provided by transport layer

Down

1. One of the service provided by transport layer

- **3.** Assembling segments with necessary information and passing them to network layer is called as?
- **5.** A device used to connect two separate networks that use different communication protocols
- **6.** Protocol for transmitting multiple streams of data between two end points at the same time that have established a connection in network.
- **7.** Which type of buffer is best suitable in flow control
- **8.** Ordered delivery of data is possible in which transport layer protocol
